        - Upload pic
        - Choose a color
        - Use specific day's mood tracker color as background

Design:

- Changes:
    - Monthly >> month: clicking on month in monthly view expands the month to full screen/open up over the yearly view
        - Summarize the number of events, notes, and tasks with their key symbol
    - Mood Tracker + Month Pie chart : adding a pie chart for the current month's mood to the right of the year view
    - Weekly: possible idea: if click on a day, will expand to the tasks and events for that day
    - Future Log: Plan future events/tasks, scrolling feature
